HONGKONG, WEDNESDAY, JANUARY 8, 1806.

A SERIOUS BLUNDER.

DAKIN, CRUICKSHANK & His Excellency the Governor has, of his own authority and without legislative sanction, suspended the operation of the Tight and Pass Ordinance. He has committed an offence, and a great offence, against constitutional law. JAMES II lost his throne for the same offence. No charge was more bitterly pressed against Str. John Pope He wessey than that he, of his own authority, directed the Executive Officers of the Government not to put in force certain laws affecting Chinese criminals. is a fundamental principle of English Constitutional Law that only the lawmaking power can interfere with a law once made. When His Excellency determined, and rightly determined the Light and Pass Ordinance ought not to be in force, it was his duty to have called the Legislative Council together and either to have repealed the law or amended it, or suspended it. But perhaps his Excellency did not care to meet the Legislative Council. Had he called the Council together for such a purpose there would have been some strong expressions of opinion about the general policy of the Government in its DAKIN, CRUICKSHAJIK & Co.'s WATERS are dealing with the Chinese, and the opinions his Excellency has received in private might have been conveyed to him a little more forcibly in public. We strongly Special terms to HOTELS, CLUBS, MESSES and recommend the Government to legalize its position by calling the Council together very speedily, and putting through the Any complaints should be addressed to the measures necessary to make binding what has been done by the Governor There will be no opposition to his proposals to modify the Ordinance and to modify it very extensively; he will find a general concurrence in his opinion that it should not be entirely repealed, but should be kept in reserve. He may have to answer or evade some vexatious and bewildering questions, but better submit to that than allow things to continue in their present unconstitutional state; While dealing with this subject we may as well call attention to the wording of the Colonial Secretary's letter to the Captain Superintendent of Police, sent us for

DARING PIRACY NEAR HONGKONG.

TWO OF THE VICTIMS NOW IN HOSPITAL HERE.

From two patients in the Tung Wah Hospital the following tale of a daring piracy was obtained by the Police this morning :- On the and fanuary a large trading |unk of 1,500 picula capacity, with a general cargo of merchandisc, a crew of twelve hands, with three passengers, left the harbour of Penghol, bound for this port. On the following day (3rd inst.) near the island of Nim Shan, about half way between Swatow and Hongkong, they we attacked by two pirate junks which came close to them without exciting suspicion, and then attacked them with muskets and stink-pots. During the first onslaught one sailor was shot under the arm and one passenger hadly injured in the leg. The trading junk's crew then surrendered, and the vessel was taken possession of by the pirates, who numbered about fifty all told.

The crew and passengers were, as usual, driven below, where they were kept for two days and two nights. During this time the de-peradoes | One prominent firm in San Francisco says that sailed their prize to a bay near by, where they carefully examined the cargo, finally trans- them a car-load of buttons at a lower price pe ferring two-thirds of this and all clothing and money they could find their own boats, in which they sailed away during the night... The goods stolen from the trading junk were valued at about \$7,000. The crew confined below soon discovered the absence of their captors and breaking out of their stuffy cabin, sail was at once set for Hongkong, which was reached on the 6th instant.

The outrage was reported to the Kowloon Customs, and the wounded men were sent to the Tung Wah Hospital. It is said by the wounded passenger that he can find b-th the pirates and their junks; so it'is to be hoped that a serious attempt will be made at once to bring these sea-robbers to justice.

WE observe from recent San Francisco exchanges that the Pacific coast commercial coteries are in a state of utter bewilderment at the threstened industrial invasion of America by the Japanese. a traveller representing a Kobe firm offered great gross than the local manufacturers could produce them at per gross simple (12 dezen). This identical firm also offers matches at 40 cents per great gross. This needs no comment; it speaks for itself and the question is merely this-Will America have to levy a special tariff as sgainst Japan? We should not be surprised if this was the solution of one of the most important commercial difficulties of the day, which must sooner or later be very definitely settled.

# TRE SHAUKIWAN TRAGEDY.

CORONE, 'S INQUEST,

At the Magistracy this afternoon an inquest was held by the Coronor Into the circumstances attending the deaths of Pan Kum-lol and Sunt Singh, P.C. 545, at the Shankiwan Police Station, on the evening of the and instant, as reported in these columns on the 3rd. Acting Inspector Hall, of Shaukiwan stated :-

At 9 p.m. on the and ult, while in the Charge Room at my station I heard the sound of a shot fired behind the station. I went out and on the steps leading along the compound of the Hongkong and Shanghai Banking, at the back of the Charge Room I saw a Chinaman with his jacket smouldering. He was assisted into the Charge Room, where he collapsed on the floor. As he appeared to be wounded I examined him and found he had a bullet wound low down on the left side. There was also a hole on the left side of the back where the bullet had come out. I saked him what was the matter, and he said "I am shot," asked "Who shot you?" and he replied." Sunt Ah Singh, the Police trooper," I sent for the interpreter and bound up the wound roughly, sent for the ambulance and ordered him to be taken to the Government Civil Hospital. When I got to the Hospital later I found them carrying the body (for he had died on the way) to the Mortuary. I was present when the identification by the deceased's father took place, After sending the Chinaman away, I searched the station for Sunt Singh, P.C. 545, and found him, after a time, in the bathroom. While binding up the wounds of the Chinaman I heard two shots fired in quick succession from somewhere near the station. P.C. McSwyd, No. 14 and I searched the station, and in the bathroom found constable No. 545, named Sunt Singh, lying on his back,.... end. He had been standing facing the doorway. This rifle (produced) was lying by his side with an empty cartridge in the barrel. Another empty cartridge case was lying between his legs, between his feet, and four loaded cartridges were in the inside b east-pocket of his overcost. He was quite dead. A bullet had penetrated I the right side of his neck, which was burned, and the top of his skull was fractured; and there was a mark of where a bullet had struck the joists above. On searching the stable again we found one loaded cartridge inside the door, and inside a room leading from the stable (the saddle-room) we found an empty cartridge case and two other loaded cartridges, making a total of ten cartridges... he had had. There were blood stains on the wall of the saddle-room, in the corner near the door, and also drops of blood on the floor. Close to the stains was a builet hole through a glass window. On searching the next morning I saw. a bullet mark on the wall of the Station storeroom about 60 feet off. The body of the Indian was sent to the Moriumy, where I saw it and

was present at the identification. . His Worship :--How did he get the cartridges? Witness;-Each constable is allowed 20 revolver cartridges and five cartridges for his carbine. But he had not taken his own. He stole them from the pouch of No. 501, which was hanging over the rack from which he took his own rifle. I cannot account for the first of the last two shots.

Dr. Maiques, who held a fost mortem examination of the two bodies on the 4th inst, said,-One was that of a Chinaman, the other that of the body of the Chinaman, and stated that death resulted from hemorrhage. The wounds might have been made by a bullet from a Maritini-Henry carbine. Death in the case of the Indian was caused by cerebral concussion, and must have been instantaneous.

Pan Mi, a tea-house keeper of Shaukiwan, who is the father of the deceased Pan Kum-lol. stated that he had identified the body of his son at the Mortuary. P.C. 253, a lukong, testified to being told by

the deceased Chinaman that Sunt Singh had shot him. When asked "Why were you shot?" he did not answer.

At this point the inquiry was closed, his PINDING

THE AMERICAN MERCANTILE

MARINE.

NEW YORK, December 1st.

The annual report of Mr. Eugene F. Chamberlain, Commissioner of Navigation, shows due, together with interest, on two bills that the number and tonnage of the American of exchange frawn in Japan on the defendant. merchant fleet for the year have been nearly stationary. On June 30th it comprised 23,240 | October last, was accepted by the defendant, as documented verreis of 4.635,960 tons, a decrease . a partner in the Chok Sta firm, on the arst of 50,000 tons since June 30th, 1804. This October, and become due fifteen days later, or of two summers ago, for the production of our on the 14th October, was accepted on the 29th shippards in April. May and June this year much | October by Leang Yuk, alfas Llang Ah Kwo, trips of the St. Louis and St. Paul. Our fleets on the Great Lakes out-numbers that of any nation except England and Germany.

Witness accepted the second bill for flag Is due the fact that the United States and 1 \$1,000. Italy, alone among maritime notions, have a . After listening to the arguments of the learned smaller carrying capacity on the occean than counsel for plaintiff, his Lordship gave judgment they had twenty years are when President Grant for the amount of the first bill, but decided that urged Congress to pass the Free Ship Bill. The defendant was not liable for the second one, as significant fact is adduced that last year going and the person accepting had no authority to do so Seming the voyage between the Valled Binter on his behalf.

and Europe was made only 252 times by vessels under the American flag and 12,233 times by vessels under foreign flags. Comparing the fine demonstration of our naval power at Kiel with the fact that only five American merchant versel with crews all told of barely 150 men visited Germany during the entire year, Commissioner Chamberlaio quotes effectively Captala Mahon's statement that a navy cannot long exist without a large merchant marine as a reason for its maintenance, and that while like the Navy of Louis XIV, it may be fair to look upon it, will prove a growth which, having no root, soon withers away.

Assuming that the free ship bill may not pass this season, Commissioner Chamberlain proposes as an alternative the extension of the Act under which the New York and Paris were admitted to register and the Sr. Louis and St. Paul were built in the United States. Leading shipbullders have declared their approval of this proposition and the Bureau believes that it will be adopted in the coming session, the good results of the experiment in the case of the four steamers named proving that the principle can with entire safety be made general.

Other proposed methods of building up the U S, merchant marine are examined. It is shown that the scheme of imposing discriminating duties on foreign vessels conflicts with thirty-three of our treaties of friendship and commerce-FORMOSA CUP. (presented); for all ponies practically the whole world-and that these first raced as griffing at Amoy or treatles were negotiated by the leaders of political thought in all parties, from John Jay to Hamilton Fish and Thos. F. Bayard, and that, if the treatles were all abrogated we should merely invite retaliation on American vessels. The subject of subsidies is discussed briefly. as having little support in this country, but a full translation of the report of President Faure. Minister Siegirled and other French statesmen is printed, showing the meagre results and great expense of the French subsidy system.

The condition of the American sailor, as affected by the laws, receives exceptionally full treatment, Commissioner Chamberlain proposes that the Government take full control of the shipping Commissioners' offices with a view to making them, as they were designed to be, the sole employment agencies for seamen,

The abolishment of compulsory pilotage on coasting vessels in the ten states from Maryland to Texas is recommended, as such pilotage is a discrimination against American sailing vessels

and in favour of foreign steamers. The repeal of one of our most unbusiness-like laws, the law exempting from tonnage t.x:s is U. S. ports vessels coming from ports in which our yessels are exempt from that tix, is strongly recommended. During the seven years of its operation American vessels have been relieved of about \$10,000 taxes in German ports, while we have exempted German vessels of nearly \$500,000. Similar revelations, though not on so large a scale, follow examination of returns from other countries which have come under this law. The report also recommends a reduction from three cents to two cents per ton tonnage tax or vessels from nearby ports. Free ship-building materials for American vessels in the constwise. as well as the foreign trade, is recommended, and the repeal of eighteen sections or statutes relating to minor matters is advised on the ground of their uselessness.-New York Maritime Register.

WHAT OUR FLEET WILL HAVE TO DO IN TIME OF WAR.

THEIR GWN PORTS

It will have-(1) TO BLOCKADE THE HOSTILE SQUADRONS IN

so says, the Royal Commission on the Defence of our coaling stations. And what strangth is regulred for this blockade? Admiral Sir Geoffrey Hornby, with his immense experience after years of service in our fleet, says that our strength must be as two to one; that is two English blockading battleships to every French or Russian blockaded. Committee on the Naval Mancenvres, 1888, in a Government report, put it a little lower. ... They say : " Under the altered conditions which steam and the development of attack lecometive torpedoes have introduced into naval warfare, it will not be found practicable to maintain an effective blockade of an enemy! squadrons in strongly-fortified ports, without the blockading battleships being in the proportion of at least five to three, to allow a sufficient margin for casualities." This report is signed by three Admirals .- Naval Annual 1889, p. 224. (2) TO PLACE A RESERVE SQUADRON NEAR

Report of the same Committee :- "There should always be an effective reserve squadron absolutely confined to home waters, sufficient of it. I did so, and presently felt great relief. It was to hold the Channel and protect the coasts and not long before the bad symptons all left me, and commerce of the United Kingdom, in addition gradually got strong. I keep in good health, and to the coast-defence ships, which would be have pleasure in making known to others the remedy required for active local defence,"-Id., p. 447. And the Admiralty Lords calmly put this, on one side and say :- "This would be im- remedy, and says had he known of it sooner he would possible in Your Admirals ask for a thing and have been saved years of misery. it is refused them. At the present moment wedare not ask for it-Id., p., 447.

ENGLAND.

(a) TO PROTECT OUR TRADE. Our immense merchant marine, 11,660 ships to attack by cruisers averywhere, \_We must convoys. For this we shall want seventy or approach. Prevention is better than cure. eighty very fast ships at least. We have only for fast cruisers altogether, of which more than one-half will be wanted for the blocksde, - Lloyd Returns, 1894.

The same Committee reported .. that our fleet of cruisers must be strong enough to give convoy and protection to our merchant ships. What says the Admiralty in reply :- "The days of convoy are past," A simple assertion defying the opinion of all experts !-Naval Annual 1889. P. 448.

(4) TO PROTECT OUR COALING STATIONS, many of which are very ill-defended. The Falkland Islands have not a single gun.

HOW PRANCE WILL ATTACK US. By French Naval Officers.

Messieurs Z. and H Monté:hant give us some ideas on this point in their Essat de Stratigit. They say,-"There are no laws of war, but those of the strongest; generosity is only cowardice. feebleness, or folly," They add that France wil (1) raid the Bristol Channel, the Channel and the Thames with fast cruisers. (2) Destroy English shipping in the Mediterranesn. (3) Plunder, burn and sink English shipping on the distant seas. (4) Bombard at night defenceless towns, such as Brighton or Hastings, and kill or malm hundreds of helpless women, children and invalids. "Since they crew of 25 men, while Capt. Farnham Doty, a wish it," they tell us, "our cruisers, our gunboats and our torpede-boats shall burn their towns." OUR PATE.

If we are beaten we shall get no mercy Thus the Friend Commercial News of the 6th Plus d'Angleterre describes the defeat of ultimo; -The Billsh steamer Evandals, hence Eugland by France, and gives the terms of N'wimber.8th for Japan and China, has not yet | our disgrace :- 1. Every English warship, affoat beer reported arrived, and yesterday 20 per cent, | or on the stock, to be surrendered to France. 2. Not more than fifty warships to be maintained by us in the future. 4. Our Army not to exceed 50,000 men. 4. An indemnity of £560,000,000 to dale arrived here considerably overdue a few | be paid. 5. Dover to be surrendered to France in perpetuity. 6. The Channel Isles, Gibraltar, What would shortly be an overdue risk is the Malta, Cyprus, Sierra Leone, the Gold Coast, the 18. The Egyptian Antiquities and Eigin Marbles in the British Museum to be given up to France, It is added that Russia had made herself mistress of the best part of India whilst we were thus fighting for our lives, and that Ireland had become an Independent Republic under the protection of France, When the terms were read out at the Guildhall-"there followed the deep silence of the grave; there were toars in the eyes of the English." And well there might be AN EMPTY HOPE.

> Englishmen will say-" Europe, Germany, Italy will never allow this, we are certain to baye allies; Germany at least will help us." We have repeatedly refused to promise assistance to Italy and Germany, because we want to be free from Continental complications. Why, then, are these States to sacrifice their soldiers and sallers for us? Only considerations of interest can lead them to support us, and Germany has everything to gain by watching England, France, and Russia exhausting themselves in a terrible war. Her ships will get the carrying trade which will pass from our mercantile marine, Italy is too poor and too weak, too much exposed toes land attack from France, to move without Germany. We shall do well to put no faith in allies; we shall do better if we make our fiset strong enough to crosh the combined forces of any two States. Nor, if we put off preparation till the last minute; shall we be able to make good our deficiences. War sailors require years of training; ironclads and cruisers cannot be built in a few weeks. The unready are doomed before the struggle beginswitness China !- Navy League Pamphlet.

> > THE WORLD RUNS AWAY FROM US.

TEN other day we had a talk with a man who know as little of the world around him as a baby. Yet he was a man of naturally fine intelligence. He had just been released from prison. Ten years ago he was incarcerated under a life sentence. Becently, however, circumstances had arisen which proved his innocence. and he obtained his freedom. But nothing seemed as before. He had been stationary while the world moved on. Many of his old friends were dead, and all were changed. A big slice of his career was lost, and worse than lost. Could he ever make it up? No, never. Besides, although he had committed no offence, the more fact that he had been convicted of one, would always place him at a disadvantage.

Different as it is in all outward conditions lou illness produces results which resemble those enforced solitude. When confined to our homes by disease we are virtually out of the world. Briends may, and do, pity us; but they do not lie down by our side and suffer with us. Ah I no. They go their own way and leave us alone. In the midst of company we are still alone. Hajoymont, food, sleep, fresh air, movement, work, do -those are for them, not for us. Also for the poor prisoner whose fallor is some relamitiese disease. Who shall open the iron doors and set bies free?

This letter is signed, by Mr. Charles H. Smith, o 19. New City Road, Glasgow, and dated February 15th 1893.

Before we hear how he was at last delivered from the slavery of illness, let us listen to the words of a lady on the same theme: Mrs. Mary Ann Rusling, of Station Road, Misterton, near Gainsborough. In a brief note dated January Srd, 1893, Mrs. Rusling says she suffered in a similar way for over fifteen years. Her hands and feet were cold and clammy, and she was pale and bloodless. She had pain in the left side and palpitation, and her breathing was short and hurried. No medicines availed to help her until two years ago, "At that time," she says, "our minister, the late Rev. Mr. Watson, told me of Mother Seigel's Curative Syrup, and urged me to make a trial which did so much for me,"

Mr. Smith was completely cured by the same
